

Sheng Cheng

Address: Huashan Road 1954, Shanghai, China 200230

Phone: +86 15000108116

Email: cs20041110@gmail.com

EDUCATION

Ph.D. in Management	Purdue University West Lafayette	2026.08 -
Bachelor in Economics	Shanghai Jiao Tong University Shanghai	2022.09 - 2026.06
Selected Courses: <i>Advanced Microecon., Game Theory, Optimization Methods, Integer Programming, Algorithm Design.</i>		
Exchange Program	McGill University Montreal	2024.08 - 2024.12
Courses: <i>Combinatorial Optimization, Discrete Math. (Honor), Analysis (Honor), Operation Management</i>		

RESEARCH

A Polyhedral Approach for Stochastic Choice Model	2025.02 -
<i>(joint with Taotao He, Mohit Tawarmalani)</i>	
- Revisited the representation theorem for random utility model using a polyhedral approach. - Analyzed theoretical properties of various stochastic choice models from a polyhedral perspective.	
Choice Branching, Memory, Responding Time	2026.03 -
- Proposed a choice branching model to capture searching behavior. Introduced a novel feature: memory. - Introduce a new primitive: responding time. Utilizing responding time to infer memory level and reveal preference under limited data.	

ACADEMIC EVENTS

Micro Theory Reading Group Shanghai Jiao Tong University	2024.09 -
- Delivered 75 minutes microeconomics theory seminars. Delivered talks (<i>Stochastic Choice & Limited Attention</i>): <i>A Random Attention Model (JPE 2020);</i> <i>Inferring Cognitive Heterogeneity from Aggregate Choices (ECMA 2020).</i> - Served as student coordinator, supporting administrative and logistical arrangements.	
Decision Theory Reading Group Shanghai Jiao Tong University	2026.03 -
Delivered 30 – 60 minutes decision theory seminars. Delivered talks: <i>Random Utility with Unobservable Choice (ECMA 2025);</i> <i>An Alternative Approach for Nonparametric Analysis of Random Utility (JET 2025);</i> <i>Choice Branching, Memory and Response Time (own work).</i>	
Decision Theory Summer Workshop Shanghai Jiao Tong University	2025.06
Completed a one-week course on decision theory taught by Prof. Yusufcan Masatlioglu, covering topics including stochastic choice, limited attention, bounded rationality, and ordered probabilistic choice, etc.	

WORK EXPERIENCE

Macro Research Intern	CICC Shanghai	2026.03- 2026.06
Conducted thematic research on macro market, including data collection, chart construction, and		

literature review; contributed to analytical reports.

Topic: *Evolution of the International Monetary System since the 20th Century*.

- Regularly summarized domestic policy developments and global macro market news.

Commodity Research Intern Orient Securities Shanghai 2024.06 - 2024.08

- Collected and analyzed commodity market data; produced regular research reports.
- Participated in carbon emissions trading projects; compiled supporting materials and assisted in market analysis.
- Contributed to the testing and validation of OTC derivatives valuation models; conducted backtesting based on historical market data.

HONORS & AWARDS

PhD Award	Daniels Business School, Purdue University	2026
First Prize	18th “Challenge Cup” National Undergraduate Academic Competition	2023
Honorable Mentioned	Mathematical Contest in Modeling	2024
Shuping Scholarship	Shuping Fund	2023, 24, 25
Undergraduate Academic Scholarship	Antai College, SJTU	2023, 24

SKILLS

Language	TOEFL: 111/120 (R 30/30 L 30/30 S 24/30 W 27/30) GRE: Verbal 156 + Quantitative 170 + Analytical Writing 3.0
Programming	Proficient: Python(numpy, pandas, scikit-learn), Julia(JuMP), LaTeX Intermediate: VBA, Stata, R, SQL
