EDUCATION

Purdue University, West Lafayette 2026 -
Ph.D. in Management - Quantitative Methods

Shanghai Jiao Tong University, Shanghai 2022 - 2026
B.A. in Economics *(with distinction)*
- Courses (selected): *Advanced Microecon., Game Theory, Optimization Methods, Real Analysis*
- Referees: *Taotao He, Xi Zhi Lim, Weicheng Min, Hailong Sun*

McGill University, Montreal 2024
Exchange
- Courses： *Combinatorial Optimization, Discrete Math. (Honor), Analysis (Honor),Operation Management*

RESEARCH INTERESTS

Optimization (Mixed Integer Programming), Economic Theory (Decision Theory, Market Design)

RESEARCH EXPERIENCE

A Polyhedral Approach for Stochatic Choice Model 2025 -
(with *Taotao He*, *Mohit Tawarmalani*)
- Revisited the representation theorem for random utility model using a polyhedral approach.
- Analyzed theoretical properties of various stochastic choice models from a polyhedral perspective.

Choice Branching, Memory, Response Time 2026 -
- Proposed a choice branching model to capture searching behavior. Introduced a novel feature: memory.
- Introduce a new primitive: responding time. Utilizing responding time to infer memory level and reveal preference under limited data.

ACADEMIC EVENTS

Micro Theory Reading Group**,** Shanghai Jiao Tong University 2024 - 2026
- Delivered 75 minutes microeconomics theory seminars. Delivered talks: *A Random Attention Model (JPE 2020), Inferring Cognitive Heterogeneity from Aggregate Choices (ECMA 2020).*
- Served as student coordinator, supporting administrative and logistical arrangements.

Decision Theory Reading Group**,** Shanghai Jiao Tong Univesity 2026
- Delivered 30 – 60 minutes decision theory seminars. Delivered talks:
  Random Utility with Unobservable Choice (AER 2026), *An Alternative Approach for Nonparametric Analysis of Random Utility* (JET 2025); *Choice Branching, Memory and Response Time* (own work).

Decision Theory Summer Workshop**,** Shanghai Jiao Tong University *2025*
- Completed a one-week course on decision theory taught by Prof. Yusufcan Masatlioglu, covering topics

including stochastic choice, limited attention, bounded rationality, and ordered probabilistic choice, etc.

WORK EXPERIENCE

China International Captital Corporation, Shanghai March - June 2026

Macro Research Intern

- Conducted thematic research on macro marktet, including data collection, chart construction, and literature review; contributed to analytical reports.
- Regularly summarized domestic policy developments and global macro markt news.

Orient Securities, Shanghai June - August 2024

Commodity Research Intern

- Collected and analyzed commodity market data; produced regular research reports.
- Participated in carbon emissions trading projects; compiled supporting materials and assisted in market analysis.
- Contributed to the testing and validation of OTC derivatives valuation models; conducted backtesting based on historical market data.

HONORS & AWARDS

PhD Award, Daniels Business School, Purdue University	2026
Shuping Scholarship, Shuping Fund	2023 - 2025
Undergraduate Academic Scholarship, Antai College, SJTU	2023 - 2024
Honorable Mentioned, Mathematical Contest in Modeling	2024
First Prize, 18th “Challenge Cup” National Undergraduate Academic Competition	2023

SKILLS

Languages

English (Fluent): TOEFL 111/120, GRE 326/340

Chinese Mandarin (Native)

Programming

Python, Julia, LaTex, Excel

Miscellaneous

Tennis, Music, Photography, Movie, etc
